About me

I'm a positive and hardworking individual with a passion for fitness, gaming, and music. Outside of work, I enjoy staying active, playing video games, and relishing quality time with my dog and beloved girlfriend. Music is a constant source of inspiration in my life. These diverse interests and relationships outside of work shape my well-rounded personality and drive my commitment to excellence.

Experience

Over the past year, I've gathered valuable experience in the design industry, starting as a freelance designer and recently transitioning into a role as a graphic designer for the last three months. I've developed a strong foundation in design principles and honed my skills with dedication and a positive work ethic. My aim is to consistently deliver excellence in every project I undertake.

Designer
October 2022 - Present
Freelance

- Working on projects i find through freelance platforms and friends - from mouth to mouth.

Graphic designer
July 2023 - Present
Agma Studio

- Primarily working on web design projects and developing them with Elementor.
- My work also includes doing things that are more graphic design related.

Education

I have a Bachelor's degree in Political Science from UNWE and I'm currently enrolled in an ongoing course at Soft Uni, demonstrating my commitment to continuous learning and skill development.

Soft Uni
April 2023 - Present
Cources

- Design Basics
- UI/UX Design
- Illustrator
- Photoshop
- InDesign
- After Effects

Webflow
January 2023 - Finished
Cources

- Flux Academy

English
2003 - 2013
Cources

- Cambridge English: First (FCE)

Software Skills

I maintain a strong grasp of software skills and thrive on constant learning, perpetually exploring new tools and technologies in the ever-evolving industry. This commitment ensures that I remain adaptable and capable of making valuable contributions in any role.

Design Tools

- **Figma** - I primarily use it for UI-UX Design purpose. Very good knowledge
- **Illustrator** - Mostly for graphic design projects and logo creation. Very good knowledge
- **InDesign** - Sometimes i prefer using it for graphic design and print projects. Good level of knowledge
- **Photoshop** - Main use for image editing. Good level of knowledge
- **After Effects** - I don't use it often. Basic level of knowledge

No-code Tools

- **Webflow** - In my opinion the best no-code tool for website development so far. Very good understanding and knowledge.
- **Elementor** - I use it in my current job for everyday projects. Mainly for websites that are static to mid level of difficulty. Very good understanding and knowledge.

AI Tools

- **Chat GPT** - I use it on an everyday basis. Very helpful tools.
- **Mid Journey** - i use it from time to time. Also very helpful tool.

Languages

- **Bulgarian** - Native language
- **English** - Excellent knowledge of the language. I use it on a daily basis.
